

Double Overhand Knot

The Double Overhand Knot is tied like the regular overhand except pass the end under and up through the loop two times instead of just one. This makes a larger knot to stop the rope from sliding through a hole or a loop of another knot.

Figure Eight Double Knot

The Figure Eight Double Knot is tied like the regular figure eight but two ropes are used.

Joiner Knots

Joiner knots are used to tie two ropes together.

Square Knot (Reef Knot)

The Square Knot is a joiner knot used to join two ropes or strings of the same thickness. To tie: pass the right end over and under the left end, curve what is now the left end towards the right, cross what is now the left end over and under the right. Draw tight.

Tie a square knot while telling that if you keep your eyes on Jesus you will always be in the right and your life will hold because this knot won't slip.
